USSN 09/771,431; Attorney Docket 11-00

43. (Once amended) A form having a removable piece attached thereto by a magnetic system comprising:
- (a) a magnetic assembly having a depth-of-pull sufficient to cause the removable piece to begin to [seek home] move toward the form at a distance from the form of [at least about one inch] more than about one-quarter of an inch, said magnetic assembly being positioned on said form or said removable piece; and
  - (b) an attracted material positioned on the other of said form or said removable piece so as to mate with said magnetic assembly
44. (Once amended) The form of claim 43 wherein said depth-of-pull is sufficient to cause the removable piece to begin to [seek home] move toward the form at a distance of more than about three-fourths of an inch.
45. (Once amended) The form of claim 43 wherein said depth-of-pull is sufficient to cause the removable piece to begin to [seek home] move toward the form at a distance of more than about two-thirds of an inch.
46. (Once amended) The form of claim 43 wherein said depth-of-pull is sufficient to cause the removable piece to begin to [seek home] move toward the form at a distance of more than about one-half of an inch.
47. (Once amended) The form of claim 43 wherein said depth-of-pull is sufficient to cause the removable piece to begin to [seek home] move toward the form at a distance of [more than about one-fourth of an] at least about one inch.

66. (Once amended) The form of claim 65 wherein said magnetic assembly comprises two neodymium radial arc magnets touching [said] a ceramic magnet but spaced apart from said pole piece.
